CERTIFICATIONS

CompTIA A+ • CompTIA Security+ • CompTIA • Ongoing
Google Cybersecurity Professional Certificate • Coursera • 2024
Certified Scrum Product Owner (CSPO®) • Scrum Alliance • 2018
ICAgile Certified Professional (ICP) • ICAgile • 2017
Web Development Immersive • General Assembly • 2016

SKILLS

Cybersecurity: Wireshark, Wazuh, Linux, Oracle VM VirtualBox, Network Traffic Analysis
Technology: HTML5, CSS3, JavaScript, Node.js, MongoDB, SQL, MySQL, Git, JSON
Strategy: Cross-functional Collaboration, Agile, Scrum, Product Roadmap, Innovation, Critical Thinking
Software: Jira, Confluence, Trello, Google Analytics 4, Google Tag Manager, Mailchimp, Figma, Mixpanel, Hotjar, ProdPad
Business: Product Management, User Interview, Customer Interaction, Tracking Metrics, Data & Business Analysis

EXPERIENCE

Project Engineer (Central Project Engineering)

RFNet

Feb 2026 - Present, Singapore

- Executed monthly vulnerability assessments across 10+ biometric database systems using Tenable Nessus, identifying 10–15+ vulnerabilities per cycle and remediating 100% of critical findings within 30 days through coordinated patch and hotfix deployment; maintaining zero critical exposure across production environments.
- Hardened network infrastructure for 20+ Automated Armory System kiosks across multiple agencies, implementing firewall rule sets, IPv4/DNS configurations, and SSL/TLS certificate installations; passing 100% of Factory and On-Site Acceptance Tests against security specifications on first deployment.
- Maintained 99% uptime across multiple wireless access points spanning all bus depots by performing daily remote monitoring, wireless traffic analysis, and on-site remediation; reducing unplanned downtime through proactive fault detection and hardware replacement cycles.
- Managed end-to-end access control governance for armory kiosk operations, enforcing provisioning and de-provisioning protocols across multi-agency sites and leading end-user training sessions on secure operations, access procedures, and incident reporting; driving consistent compliance with organisational security policies.
- Coordinated cross-agency deployments by translating stakeholder requirements into implementation timelines, aligning technical delivery with compliance milestones, and providing escalation-tier technical support across concurrent projects; supporting on-time delivery for multi-site rollouts.

Project Engineer (AAS)

RFNet

Dec 2025 - Feb 2026, Singapore

- Configured and hardened network infrastructure for Automated Armory System (AAS) kiosks including IPv4/DNS settings, firewall rule implementation, and SSL/TLS security certificate installation to ensure secure communications and prevent unauthorized access.
- Conducted comprehensive Factory and On-Site Acceptance Testing (OSAT) for new kiosk deployments across Ministry of Home Affairs (MHA) agencies, validating security controls, network configurations, and GUI functionality against technical specifications.
- Managed physical access control operations for armory kiosks at various project sites, ensuring proper assignment protocols and security integrity during user provisioning and de-provisioning activities.
- Supported project planning and implementation for multi-agency onboarding initiatives, coordinating stakeholder requirements, deployment timelines, and security compliance measures for new AAS locations.
- Developed training materials and conducted end-user training sessions on secure system operations, access procedures, and incident reporting protocols.

IT Engineer (IDEMIA ABCS)

RFNet

May 2024 - Nov 2025, Singapore

- Diagnosed and resolved customer technical issues with 90%+ success rate using targeted troubleshooting techniques and root cause analysis to identify and eliminate recurring problems.
- Maintained 99.9% system uptime through rapid on-site incident response and strategic escalation of complex issues to senior engineers for permanent resolution.
- Partnered with third-party vendors to troubleshoot complex hardware, software, and network problems, achieving 90%+ resolution rate through effective collaboration and systematic problem-solving.
- Extracted and analyzed system logs using Elasticsearch and worked with senior engineers to investigate infrastructure challenges and implement technical solutions.
- Performed preventive and corrective maintenance on hardware/software systems and executed IMAC operations including IP configuration, firewall management, and security patch deployment with detailed documentation.

Mastercard Cybersecurity Virtual Internship

Forge

Mar 2024 - Mar 2024, Singapore

- Completed a job simulation where I served as an analyst on Mastercard's Security Awareness Team.
- Helped identify and report security threats such as phishing.
- Analyzed and identified which business units needed more robust security training and implemented training courses and procedures for those teams.

IT Executive (Healthcare Intelligence)

Centre for Healthcare Innovation

May 2023 - Dec 2023, Singapore

- Provided Level 1 IT support to end-users on the Enterprise Data Warehouse (EDW) and Healthcare Intelligence platform, resolving technical issues and ensuring system uptime.
- Reviewed data usage and security requests, adhering to compliance protocols and contributing to data governance.
- Participated & supported the team on new projects and initiatives, including service and team rebranding, managing enhancements to the data platform to extend and improve the range of data elements, and extending to more user groups.

Product Manager

femmily

Nov 2022 - Mar 2023, Singapore

- Maintained and configured Google Analytics 4 and Google Tag Manager for the *femmily* website, enabling data-driven decision-making for user acquisition and retention.
- Spearheaded the app publishing processes for the 1st build of the *femmily* mobile application to both Apple & Google Play Stores.
- Strategized affinity mapping for user navigation of the *femmily* mobile application, considering different release phases and features.
- Wrote process documentation and devised logic flowcharts for the *femmily* mobile application including baby growth trackers, enhancing user experience and operational efficiency.

Technical Product Manager

BioMark

Jun 2021 - Oct 2022, Singapore

- Navigated complex product definition & roadmap planning, balancing customer feedback and stakeholders' input to drive prioritization of features; achieved a 75% reduction in total technical debt.
- Collaborated with development teams to build a secure platform for regional lab operations, involving security best practices and access controls.
- Integrated Mixpanel & Hotjar to track metrics across SaaS products enabling data-driven insights that led to a 20% increase in product efficiency.
- Documented product iterations and helped to improve PRDs; reconciled designs from the UX team with technical requirements and handed them off to technical teams.

Technical Product Manager

Gmedes

Jan 2020 - Jun 2021, Singapore

- Built the product roadmap aligning with the company's vision & planned product strategies to build key opportunities & partnerships, did market research to identify current trends, competitors, & opportunities.
- Revitalized both the user experience & information architecture of products using user research & reduced user errors by more than 90%, thus increasing operational efficiency by 50%.
- Implemented an analytics dashboard to track and report financial metrics, resulting in 50% faster financial reporting.
- Developed product prototypes & conducted user testing with users to do user personas and map out user journeys.
- Collaborated with an outsourced engineering team to prioritize & deliver both product & technical requirements, devised test cases & provided technical support.

Business Analyst

DBS Bank

Jul 2019 - Jan 2020, Singapore

- Developed user-facing prototypes and technical specifications for the customer service chatbot, ensuring smooth user interaction and efficient issue resolution.
- Collaborated with remote tech teams to resolve bugs and discuss product requirements.
- Devised test plans and scripts and performed test executions.
- Outlined requirement specifications with the use of standard templates for both use cases and detailed software.

Full Stack Web Developer

UI-licious

Feb 2017 - Sep 2017, Singapore

- Evaluated client requirements and generated leads, demonstrating strong communication and customer engagement skills.
- Provided technical support and maintained test scripts for clients, ensuring smooth operation of the SaaS platform.
- Developed the CLI and features for the SaaS platform, collaborating closely with clients for testing automation projects.

PROJECTS

GRC Portfolio

Practitioner artefacts for PayWave Solutions Pte. Ltd., a fictional Singapore fintech. ISO 27001:2022 gap analysis, a 16-risk register mapped to NIST CSF, a TPRM framework aligned to MAS TRM Section 9, and a seven-policy library. Cross-referenced to demonstrate integrated ISMS thinking, not isolated deliverables.
